DETAILED ACTION

Drawings

New corrected drawings in compliance with 37 CFR 1.121(d) are required in this application because the submitted hand-written drawings are not legible. Applicant is advised to employ the services of a competent patent draftsman outside the Office, as the U.S. Patent and Trademark Office no longer prepares new drawings. The corrected drawings are required in reply to the Office action to avoid abandonment of the application. The requirement for corrected drawings will not be held in abeyance.

Allowable Subject Matter

Claims 1-6 and 19 allowed.

The following is a statement of reasons for the indication of allowable subject matter: the prior art of record fail to anticipate or render obvious the following technical features as recited in the highlighted claims:

Referring to claims 1-6 and 19, the prior art fails to teach or suggest "...said second light path not being coincident in any segment with any segment

Art Unit: 2612

of said first light path, said second light path encountering said digital optical sensing apparatus at a non-zero angle with respect to said first light path".

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Dunn et al. (US 5,987,155) discloses a biometric input device with a peripheral port. The information regarding obtaining biometric information of a user is pertinent material.

Fishbine et al. (US 5,467,403) discloses a portable fingerprint scanning apparatus for identification verification. The information regarding obtaining fingerprints using a fingerprint scanning device is relevant material.
